## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to an aqueous antimicrobial composition for disinfecting, sanitizing or cleaning surfaces comprising (a), (b), (c) and (d) about 1 to 1000 ppm of an agent for introducing ions into the water, wherein the ions enhance the antimicrobial properties of the at least one essential oil, classified in class 424, subclass 405 or class 424, subclass 736 or class 424, subclass 742 or class 424, subclass 745, for example.
  - II. Claims 12-14, drawn to an aqueous antimicrobial composition for disinfecting, sanitizing or cleaning surfaces comprising (a), (b), (c) and (d) about 1 to 1000 ppm of an agent for introducing groundwater ions into the water, classified in class 424, subclass 405 or class 424, subclass 725, for example.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the two different groups are directed to two different inventions. Different compositions comprising different ingredients are not expected to have the same functional effect, as evidenced by the

Art Unit: 1651

claims themselves. These compositions are capable of separate manufacture, use or sale, as claimed, and are patentable (novel and unobvious) over each other (though they may be unpatentable because of the prior art) subjects.

3. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
